Operations Management Software

Seven Figure Cost Savings

**Collaboration**
Discover new opportunities by sharing knowledge and ideas

**Awareness**
See real-time operational performance at a glance

**Balance**
Effectively manage laboratory workflow

**Organization**
Reduce search time improving efficiency

**Traceability**
Reverse traceability reports in seconds

**Agility**
Adapt quickly using a web-based system
Manage laboratory operations with seven figure cost savings

Management Software Designed for Laboratory Operations

Collaboration
Discover new opportunities by sharing knowledge and ideas
Cal-Lab Manager facilitates collaborative innovation by connecting people with lab operations. It gives teams access to all of the corporate knowledge and ideas needed to work together more effectively. Cal-Lab Manager ensures availability of procedures, instruction manuals, notes, documents, pictures, and job status from anywhere. This sharing of knowledge and ideas promotes innovation.

Awareness
See real-time operational performance at a glance
Meeting your quality standards and profitability objectives is easy using Cal-Lab Manager with real-time insight into lab operations. Process profitability is visible through the tracking of resource time, requisitions, and sales.

Balance
Manage workflow
Cal-Lab Manager streamlines workflow by automating and minimizing the number of paths a job may flow through an organization. Supervisors can prioritize and delegate tasks for more effective use of resources. Automated reminders ensure that personnel perform follow-up and future activities.

Organization
Reduce search time
Improve efficiency
Cal-Lab Manager allows you to keystroke information once and electronically store all of the knowledge associated with a job. Active item tracking throughout the process provides increased accountability. Transfer tasks, locate procedures, items, parts, and assets in seconds. Cal-Lab Manager uses a search engine in a paperless environment to find what you need fast.

Traceability
Reverse traceability reports in seconds
Cal-Lab Manager allows you to see any out-of-tolerance items in any date range. The item links directly to the data set for immediate viewing. A reverse traceability report is available for standards in any date range.

Agility
Adapt quickly using a web-based system
Easily configurable, Cal-Lab Manager helps operations quickly adapt processes to new challenges and opportunities. Accessible by a standard web browser, implementation time for work stations is minimal — allowing for rapid deployment on a wide range of systems. Cal-Lab Manager can be configured to match corporate identity and job function with role-based security, custom graphics, status types, calibration seals, technician signatures, and more.
